

Infertility Coverage

All Slalom medical coverage options provide infertility coverage, regardless of the coverage level or carrier you select. Coverage includes artificial insemination, in vitro fertilization, assisted reproduction – GIFT and ZIFT, and cryopreservation (egg freezing) in cases of iatrogenic infertility (for example, chemotherapy).

The lifetime benefit maximums for infertility coverage are:

- \$25,000 for medical; and
- \$10,000 for pharmacy

Insurance carriers define the clinical policies used by physicians, so it is important to connect with your insurance carrier or the available Health Pros to understand the requirements for coverage. Note that **elective** cryopreservation (egg freezing) and surrogacy services are not covered by the medical plan.
